MAGICAL MATHEMATICS 【C.A.I.】

I. INTRODUCTION

Magical Mathematics is a good tutor who will be patient with your questions. If you are a man with mathematics phobia, you will need this cartridge. There are "Addition, subtraction, multiplication and division of integral and fraction", "System of linear equation with one unknow", "Compound exercises" and "mathematic blocks" in Magical Mathematics. We construct the exercises with basical concept in these, so children from 7 to 15 years

Old can play them step by step. Mathematic blocks is a game you may have seen before. It may train you as a man with super brain.

II. HOW TO PLAY GAME

1. The computer will provid questions to ask the player and the player has to answer every question. Each test includes 20 questions and there are 2 minutes per question.
2. The key "C" on the screen is "clear".
3. The way of answer :
